SKILLS

JavaScript	AngularJS	MongooseJS	Firebase
SQL	Node.js	.NET	Postgres
C#	Express.js	MongoDB	MySQL

PROJECTS

Waitr

<http://104.131.135.179/>

Waitr is a mobile app that offer a variety of ways the customers and restaurants can interact with each other. The idea of this app is to eliminate poor customer service for the guest.

The technology that waitr was built with were JavaScript, HTML5, CSS3, AngularJS, MongooseJS, Express.js, Node.js, Socket.io, Ionic, and Moment.js

Favour

<https://needsfavor.firebaseio.com>

Favour is a website application for local individuals to ask or offer services to each other. This makes it easier for local people to ask for help or someone who would like to make an extra income.

The technology implemented on this project was Semantic UI, AngularJS (front-end) and Firebase for the back-end.

Forage

Forage is a food truck finder that interacts owners with customers. It allows customers to order online, receive updates through text messages, and review different food trucks

The technology implemented on this project was Semantic UI, AngularJS (front-end), and Node.js, Express.js, MongoDB for the back-end. User authentication is accomplished via the Passport Facebook Strategy
