PROJECTS

Waitr

<http://104.131.135.179/>

Waitr is a mobile app that offers a variety of ways the customers and restaurants can interact with each other. The idea of this app is to eliminate poor customer service for the guest.

The technology implemented on this project were **HTML5**, **CSS3**, **JavaScript**, **Angular.js**, **MongoLab**, **Express.js**, **Node.js**, **Socket.IO**, **Ionic**, and **Moment.js**.

Favour

<https://needsfavor.firebaseio.com>

Favour is a website application for local individuals to ask or offer services to each other. This makes it easier for people in the same area to ask for help or someone who would like to make an extra income.

The technology implemented on this project were **HTML5**, **CSS3**, **JavaScript**, **Semantic UI**, **Angular.js**, and **Firebase**.

Forage

Forage is a food truck finder that connects owners with customers. It allows customers to order online, receive updates through text messages, and review different food trucks.

The technology implemented on this project were **HTML5**, **CSS3**, **JavaScript**, **Semantic UI**, **Angular.js**, **Node.js**, **Express.js**, **MongoDB**, **MongooseJS**, **Socket.IO**, **Google Map API**, **Google Geolocation API**, and User authentication is accomplished via the Passport Facebook Strategy.
